

Goetheanum, Dornach

Evening lecture and one-day workshop

Finance at the Threshold

Rethinking the real and financial economies

The seminar is based on a book of the same name, for which the brief was to explore western finance and the global financial crisis through the lens of Rudolf Steiner's work. Aimed at 'the City', it argues that a new, unexpected opportunity exists to bridge from today's market theory to associative economics.

Dr. Christopher Houghton Budd

British economic and monetary historian
